PROFESSIONAL SUMMARY

Analytical professional with an Honours Bachelor of Science in Actuarial Science from the University of Western Ontario and prior Health & Benefits analytical experience within the Mercer/Marsh McLennan ecosystem. Strong quantitative foundation supported by passed SOA Exams P and FM, actuarial coursework in financial modeling and statistical analysis, and hands-on experience working in professional consulting environments. Brings a distinctive combination of analytical rigor, communication ability and independent problem-solving developed through entrepreneurial leadership, digital business operations, emerging technology exploration and recent AI/data evaluation work. Recognized for adaptability, initiative and the ability to translate complex information into clear, actionable insights. Seeking to contribute analytical and client-focused strengths to Marsh McLennan Agency's Employee Health & Benefits team.

CORE COMPETENCIES

Actuarial & Analytical	Technical Tools	Professional Strengths
Health & Benefits Analysis	Excel / PowerPoint / Word	Stakeholder Communication
Financial Modeling	R Statistical Software	Project Management
